Earth Day Song: Wonderful World

**Tuesday, April 22, 2025**

[Earth Day Song: Wonderful World](#)

I Hope you all enjoyed the parade last week and had a wonderful break!

Happy Birthday to Kazya J.

Happy Earth Day today!

Our planet is an amazing place, but it needs our help to thrive! That's why each year on April 22, more than a billion people celebrate Earth Day to protect the planet from things like pollution and deforestation. By taking part in activities like picking up litter and planting trees, we're making our world a happier, healthier place to live.

Our Earth Day committee has many activities for this week! So, enjoy many of these activities that are fun and help our planet!

Get those permission slips in for our walk to Eckert's tomorrow!

Did You Know: The number of garbage trucks Americans fill each year would stretch halfway to the moon. Toilet paper tubes, made from cardboard, take two months to decompose in a landfill. A plastic bottle sticks around for way longer—it can take over 450 years to break down! But instead of turning to the trash bin, you could turn these items into an awesome telescope or a flower planter. Before you throw something away, think about whether it can be recycled or repurposed. You can also limit waste by reducing the amount of things you buy.

Happy birthday yesterday to Ms. Emma Carter! Tomorrow we will hear her birthday song!

**Wednesday, April 23, 2025**

Earth Day Song: [Rainbow Connection](#)

Happy Birthday to Ara H, Janila L, and Lailah W.

Enjoy your trip to Eckert's today!

Did you know: Researchers estimate roughly 15 billion trees in the world are cut down each year, so help offset that loss by planting a tree of your own. Trees absorb carbon dioxide and release oxygen for people to breathe. They also provide shelter and food for animals such as [squirrels](#) and [owls](#). Depending on where trees are planted, their shade can even reduce the need for air-conditioning in hotter months. How many more reasons do you need to go green?

### **Thursday, April 24, 2025**

Earth Day Song: [The 3 R's](#)

Happy Birthday to Daniella K.

Did You Know:

Does that lamp really need to be on while the sun is out? Electricity doesn't just happen—it must be produced from things around us. A lot of times it comes from fossil fuels (such as coal, oil, or natural gas) that contribute to climate change. But electricity can also be made from renewable sources like wind, water, the sun, and even elephant dung! No matter where it's coming from, try conserving electrical energy by using only what you need.

[Larger Than Life - Backstreet Boys](#) 🎵

Today's announcement song is for yesterday's birthday girl Ms. Tiffany! We hope you had an awesome birthday yesterday and have fun celebrating over the weekend!

We have no birthdays today, but we do have birthdays this weekend:

Amelia J. and Lazar S, we hope you have a great birthday!

Did You Know:

It might seem like it's everywhere, but clean, drinkable water is a limited resource. In fact less than one percent of the water on Earth can be used by humans. (The rest is either too salty or too difficult to access.) Turning off the faucet when you brush your teeth can conserve up to

eight gallons of water a day. To help save even more water, challenge yourself to take a shorter shower (but still get clean!).

We have two field trips today. One to the aquarium and one to the zoo!! Have a wonderful time:) please remember to be kind to others. The roasting needs to stop. We should not be intentionally mean to others. We need to be kind and treat others how we want to be treated. So, today I want you to give 5 compliments to 5 different people. Spread kindness and joy!
